**Cleaning and care**  
**Cuidado y limpieza**  
**Soins et nettoyage**

**Vinyl Vanes:** Dust or vacuum with an upholstery attachment. For soil removal, sponge with a mild detergent and warm water solution and blot dry. Vinyl or PVC vanes may be removed and immersed in water. Also, if a thin film of mild detergent is left on vanes, it will eliminate static electricity.

**Fabric Vanes:** Dust or vacuum with an upholstery attachment. For soil removal, sponge with a mild detergent and warm water solution (or dry fabric cleaner) and blot dry. Do not immerse in water or dry clean.

**Tiras de Plástico:** Sacuda el polvo o aspire con un adaptador para tapicería. Para remover la tierra, utilice una esponja con un detergente suave y una solución de agua tibia y seque las manchas. Las tiras deben ser removidas e introducida en agua. También si se deja una fina capa de detergente en las tiras, ello eliminará la electricidad estática.

**Tiras de tela:** Sacuda el polvo o aspire con un adaptador para tapicería. Para remover la tierra, utilice una esponja con un detergente suave y una solución de agua tibia (o un limpiador de telas en seco) y seque las manchas. No las meta en agua ni use sustancias químicas del tipo limpiador en seco.

**Volets en vinyle:** épousseter ou passer l'aspirateur avec une brosse. Pour nettoyer, passer une éponge avec un détergent non abrasif dilué dans de l'eau et éponger légèrement. Les volets peuvent démonter et immergées dans de l'eau. De plus, si un léger film de détergent est laissé sur les volets, il éliminera l'électricité statique.

**Volets en tissu:** épousseter ou passer l'aspirateur avec une brosse. Pour nettoyer, passer une éponge avec un détergent non abrasif dilué dans de l'eau chaude (ou du produit de nettoyage à sec) et éponger légèrement. Ne pas immerger dans de l'eau ni faire nettoyer à sec.
